## EXPERIENCE

Innovative Software Developer with 6+ years of experience building and maintaining website. Proficient in new frameworks such as: **ReactJs** and Angular, plus modern libraries like JavaScript, HTML, CSS.

- Working on Carnival cruise line media stream project.
- Created and designed Banking, Telecommunication and Media stream(Entertainment) website.
- Hands-on experience in ReactJS, JavaScript, Angular & along with Spring boot. Integration with other subsystems using REST API calls
- Currently I am majorly focusing in ReactJs and JavaScript technologies.
- Knowledge of Jenkins pipeline and different module bundlers (like webpack, grunt, gulp, etc)
- Currently working as a Front-end lead. Actively involved in onshore and offshore team coordination and helps team members if they need help/support. Ramp up to new joiners and help them get familiar with the application and technologies.
